Contents

0.1	Build solution	1
0.2	Exit any program*	1
0.3	Run/execute program	2
0.4	Undo*	2

This document contains useful keyboard shortcuts for different operating systems and IDEs.

* = these commands work generally everywhere, beyond your IDE.

More advanced shortcuts may be available to your particular IDE:

- For Visual Studio for Windows, refer to the documentation¹,
- For Visual Studio for MacOS, refer to the documentation²
- For Rider, refer to the documentation³,
- For MonoDevelop, you can refer to this cheatsheet⁴ or directly access the key binding panel⁵.

0.1 Build solution

OS	Keys
Linux	Ctrl + Shift + B
MacOS	Cmd + B
Windows	Ctrl + Shift + B

0.2 Exit any program*

OS	Keys
Linux	Alt + F4 or Ctrl + q
MacOS	Cmd + q
Windows	Alt + F4
