## Contents

## 1 Foreword

This document contains useful keyboard shortcuts for different operating systems and IDEs. We use the following symbols:

| Symbol | Common Name |
|--------|-------------|
| ⇧ | Shift |
| ⌥ | Option (or Alt) |
| ⌘ | Command (or Cmd) |
| ↵ | (Carriage) Return |

The sections labeled with the star symbol ("*") work generally everywhere, beyond your IDE.

More advanced shortcuts may be available to your particular IDE:

- For Visual Studio for Windows, refer to the documentation[1],
- For Visual Studio for MacOS, refer to the documentation[2]
- For Rider, refer to the documentation[3],
- For MonoDevelop, you can refer to this cheatsheet[4] or directly access the key binding panel[5].
